FAX: 651-489-8989 www.cryolab.com info@cryolab.com

Welcome to Cryogenic Laboratories, Inc.:

We, the staff at Cryogenic Laboratories, Inc. (CLI), are pleased that you have selected our services to assist you on your pathway to create your family. We are here to help you with your family-building plans. Our objective is to provide premier donor sperm services and sperm, embryo and oocyte (egg) storage, including transportation of cryopreserved reproductive material that emphasizes safety, security, and service. We work to provide safe, secure services using the latest cryopreservation technology, testing and screening that serves to protect your health and complies with state and federal requirements.

This letter explains what to expect from CLI's donor programs and storage services. It also explains what CLI needs from you. More detailed description and terms for each program and service are described in our literature and website and in the agreements, storage agreements, billing agreements and authorizations that you will be asked to sign during your involvement with us.

CLI must receive a signed copy of this 'Terms of Use' letter via fax or mail at least one business day prior to shipment of any Specimens.

CLI's Donor and Storage Programs

Our donor programs consist of several distinct programs: anonymous sperm donors, Identity-Option donors, and directed sperm donors. We provide anonymously donated semen that is tested and screened for certain genetic and infectious diseases. We provide information about the donor, including medical and personal profiles, donor audios, personality testing (Keirse), profile silhouettes, childhood and sometimes adult photos, and staff impressions to assist you in the selection of the donor best for you. Such information and images are offered for your personal use, and not for public dissemination. CLI also has a program (ID Option donors) where the donor's identity may be provided to the child when he or she reaches the age of 18. We will also assist in screening, testing and storing semen from a directed donor (a man who is known to you who is not a sexually intimate partner). We are pleased to assist individuals, married couples, and unmarried couples in our donor programs.

In the general population, every pregnancy has about a 3%-4% risk of producing a child with a birth defect or mental deficiency. CLI reviews each donor's personal and family medical history, has a physician examine each donor, and performs genetic and infectious disease screening to reduce this risk, *but it cannot eliminate the risk*. CLI performs the diagnostic tests listed in the Donor Selection Section of our website (www.cryolab.com). Although it is not possible to completely eliminate the risk of infectious diseases or genetic disorders, the tests performed by CLI reduce the likelihood of an anonymous donor passing on an infectious disease or a genetic disorder. Please be aware that we do not test for *all* genetic disorders or infectious diseases because not all genetic disorders/diseases have tests, or it is impractical or otherwise not feasible to do such tests. Therefore, there is no guarantee that all donor specimens are completely free of such genetic defects or diseases, that a pregnancy will result, or that a child born using our donor sperm will be free of disease or physical or mental defects.

Cryogenic Laboratories, Inc. also collects and stores semen from men for their own use at a later time with a sexually intimate partner. These “Client Depositors” might be undergoing medical treatment such as chemotherapy/radiation treatments or a surgery such as vasectomy that could impact their fertility. In other situations they may wish to store as backup for their partner’s future infertility treatments. In addition to services at our facility, we also offer a unique overnight collection and preservation mail-in kit that enables clients across the U.S. to bank samples with us.

Cryogenic Laboratories, Inc. also stores embryos that you have created with your partner, or with the assistance of a donor. We will arrange the transport of your frozen semen and/or embryos to and from your infertility specialist in special liquid nitrogen vapor shipping containers designed to keep the Specimens frozen for up to 7 days.

We maintain confidential medical information, and work diligently to keep it private.

What We Need from You

You agree that the Specimens are for your personal use only. You recognize that you have no right to learn the identity of an anonymous donor, and that CLI will not disclose identifying donor information or assist you in any way to contact a donor. (ID Option donors can be known to offspring at age 18.) You do not have the right to seek a donor’s identity by other means available to you, and should we discover that you have made these attempts to do so, we will pursue any and all appropriate action to protect the donor’s interests. In turn, CLI will not disclose your identifying information to the donor.

Cryogenic Laboratories, Inc. finds pregnancy reporting and tracking very important. If you become pregnant by an anonymous donor, we ask that you or your physician notify us so we can monitor the number of children born with an individual donor. Pregnancy reporting can be completed on our website.

You are the legal parent of the children born to you with the use of donated sperm. You are solely responsible for their support and custody. The donor has given up all of his rights and is released from any obligations to children born using his sperm.

Completed agreements and other forms must be in our hands prior to shipment or collection of any Specimens.

Limits to Our Services

When the semen Specimens are collected, processed and stored at our facility, there is greater predictability in knowing the quality of the Specimens after thawing. When we accept Specimens that were collected and frozen by another facility and sent to CLI for storage, the Specimens are only as good as the facility that prepared them and sent them to us.

CLI ships Specimens via Federal Express in specially designed liquid nitrogen vapor tanks. Although uncommon, shipping delays may occur due to bad weather, airplane mechanical problems, or other similar events outside of our control. In addition, tanks can fail in transport resulting in thawed or otherwise spoiled specimens. In order to minimize this risk, CLI offers you the option of having your samples shipped in separate tanks

DATE EFFECTIVE: 01/17/10	Terms of Use	FORM: DIS.10ae REV: J
---------------------------------	---------------------	--

however; you would be responsible for the additional shipping cost of the second tank. Therefore, please take this possibility into account when requesting shipments. We recommend that you place your shipping order at least several days prior to your insemination date. Same day shipping orders must be received by 2:00pm ET for FedEx. Courier orders must be placed prior to 11:00am ET. Saturday and Sunday deliveries are not available in all locations, so place orders appropriately to allow Monday-Friday delivery. Once donor sperm vials have been shipped out, CLI cannot accept them back for a credit. However, you can return them and place them into a storage account for future use. Applicable storage fees would apply.

CLI does not, and is not able to guarantee or in any way represent, suggest, or promise that use of our Specimens will result in a pregnancy for you. We do, however, provide via our website information on donors whose semen samples have produced reported pregnancies. In addition, we offer a Specimen quality warranty that provides for full or partial refunds if a Specimen does not meet our standards.

Even if donor testing shows normal results, the tests have limitations and may not always be reliable, even when properly administered. This means that Specimens may not be disease free even though the test results for such Specimens indicate otherwise. CLI quarantines all donor Specimens for a minimum of 180 days and then retests for a variety of infectious diseases prior to releasing the Specimens. CLI utilizes CLIA certified and FDA registered testing laboratories and appropriate FDA-licensed, approved, or cleared donor screening tests for donor eligibility determination. Our commitment to quality means we test above and beyond the required infectious and genetic disease testing required by the FDA. (See our website for more information on our donor screening and testing.)

CLI relies totally upon the representations of the donor that (1) Specimens produced by the donor are the donor's own (all anonymous donor donations are made at our laboratories); and (2) donor has the genetic and hereditary characteristics and health profile claimed in the donor profile completed by the donor. CLI has protocols in place to assure the identity of each donor (e.g., verification of photo ID's) who provides Specimens, as well as a tracking mechanism to track the Specimen during the processing stages. However, CLI makes no independent investigation of a donor's representations, nor is it obligated to do so. Due to the anonymity and confidentiality issues involved with semen donation, we must respect the privacy of our donors and rely on our screening methods to detect inconsistencies. CLI prides itself on its stringent screening process whereby a donor must complete a detailed medical and genetic family history, personal profile, and have an in-depth personal interview. Each step is carefully monitored for inconsistencies, and we take care to ensure accurate information is provided. We come to know our donors well and we respect their commitment to our program.

The Paper Process

We want you to read all agreements and documents that we provide. Ask questions and make sure you understand them. We will ask for signatures on the forms, and some will need to be notarized. This is to ensure that we are following your choices and directions. You may want to consult with your attorney, physician, or other advisor to review the documents before you sign them. If you have any questions about this document, please contact us at 800-466-2796, and you will be connected with the appropriate person to answer your questions.
